

HERITAGE HALL ATHLETIC FACILITY

Oklahoma City, OK

Scope: 46,000 SF

The 46,000 square foot structure abuts an existing gym to become one combined building, harmonizing with existing campus buildings, sports fields and other new and existing site amenities. Included in the program for the building are basketball courts, volleyball courts, a cheerleading practice room, and weight training facilities.

The facility not only houses the necessary components to support the school's athletic programs; it supports other functions that maximize the building's use and value. Some of these other functional areas are a dramatic lobby space for social functions, film viewing and lecturing space. These spaces are used both internally and available to outside entities. This project is part of a campus master plan developed by Elliott + Associates.
